

ABSTRACT OF THE DISCLOSURE

A method for enhancing a conventional game of Twenty-one includes the steps of providing a player an opportunity to place a Twenty-one wager to participate in the conventional game of Twenty-one; providing the player an opportunity to place a match wager that an index
5 value of at least one of an initial two cards dealt to the player will match an index value of a face-up card dealt to a dealer; dealing the initial two cards to the player and dealing the face-up card to the dealer; verifying that the player placed the match wager and paying the player a match winning amount on the match wager if the index value of at least one of the initial two cards dealt to the player matches the index value of the face-up card; and continuing with play of
10 the conventional game of Twenty-one. The method can include the further steps of: providing the player an opportunity to place a poker wager that a two-card poker hand value of the initial two cards dealt to the player will equal one of a plurality of paying two-card poker hand values; and verifying that the player placed the poker wager and paying the player a poker winning amount if the two-card poker hand value of the initial two cards dealt to the player equals one of
15 the plurality of paying two-card poker hand values.
